DECORATING METHODS

The decorating you select is just as important as finding the perfect product – it helps set the tone for your brand. Bold or refined, unique or traditional, find the perfect finishing touch for the item you've selected by visiting our website to see a full list of available decorating methods and dimensions.

Color Imprinting

Highlight your logo in vivid color on bags, pens, drinkware, technology items and accessories with this decorating which includes methods such as silkscreen, pad print and transfer. Available in single or multi-color, it's an economical way to gain high visibility. Bullet will choose the most appropriate method to obtain high visibility for your artwork.

4-Color Process

Looking to make a bold impact with a photo or 4-color process artwork? Our method allows fine halftones and an expanded color range to capture the sharpness of the design and then transfer it to the product. PMS matches not available.

PhotoGrafixx – Available for SureShip®. This level is used for most items except bags.

PhotoGrafixx-6 – Available for SureShip®. This level gives bags and totes a dynamic look.

Labeling

An ideal decorating method for items such as lip balms, this method is scratch-resistant and waterproof. Customization for brand visibility with four-color imprinting can be placed onto clear, white or holographic TufGloss™ labels.

Sublimation

Create a custom look with this permanent heat-transfer method that incorporates multi-color and half-tones for designs. All items come in a natural off-white color, however you can select a background color or provide full color artwork. If you submit a desired PMS color for the background, we will match it as closely as possible. CMYK and metallic colors are not available.

Direct Process

This method applies CMYK artwork directly on the product of your choice to achieve a wide range of colors. This method can only be printed on white and is available on sports bottles and flyers.

Offset Printing

Save money on large orders with offset printing. This technique takes ink from a plate and transfers it onto a rubber blanket that is then placed onto the piece. Recommended on white, natural, granite or glow cups only. Offset printing can range from a 1-color imprint up to CMYK for a range of various colors. PMS matching is not available with CMYK. Colored cups can be printed offset using black or metallic inks.

1 - 4 spot colors - minimum quantity 5,000 pieces

6 spot colors - minimum quantity 10,000 pieces

9 colors - (can be a combination of CMYK and spot colors): minimum quantity 25,000 pieces

Laser

Laser engraving gives your logo a clean, distinguished appearance by precisely etching the artwork into the material's surface.

Digital Mouse Pad Heat Transfers

Offered on WHITE mouse pads only. PMS matches not available.

Deboss

This classic method allows you to leave an impression of your logo in a material's surface by heat-pressing your artwork into the material. (Requires one additional business day.)

Variable Data

This printing method allows you to place unique information on each decorated piece (such as sequenced numbers or first and last names). Variable data is printed in full color on a white or clear waterproof and scratch resistant TufGloss™ label only. Exact PMS color matching is not available and this method is not eligible for rush projects.
